(PERMIT TERMS CONTINUED)

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

The issuance of this permit will allow the permittee to dewater the pit area. Maximum use of the water for mining, milling and related purposes from all dewatering wells will be made. All of the water from the dewatering wells not used for mining, milling and related purposes will be returned to the groundwater source in the manner authorized under Division of Environmental Protection's Water Pollution Control Permit issued June 7, 1989.

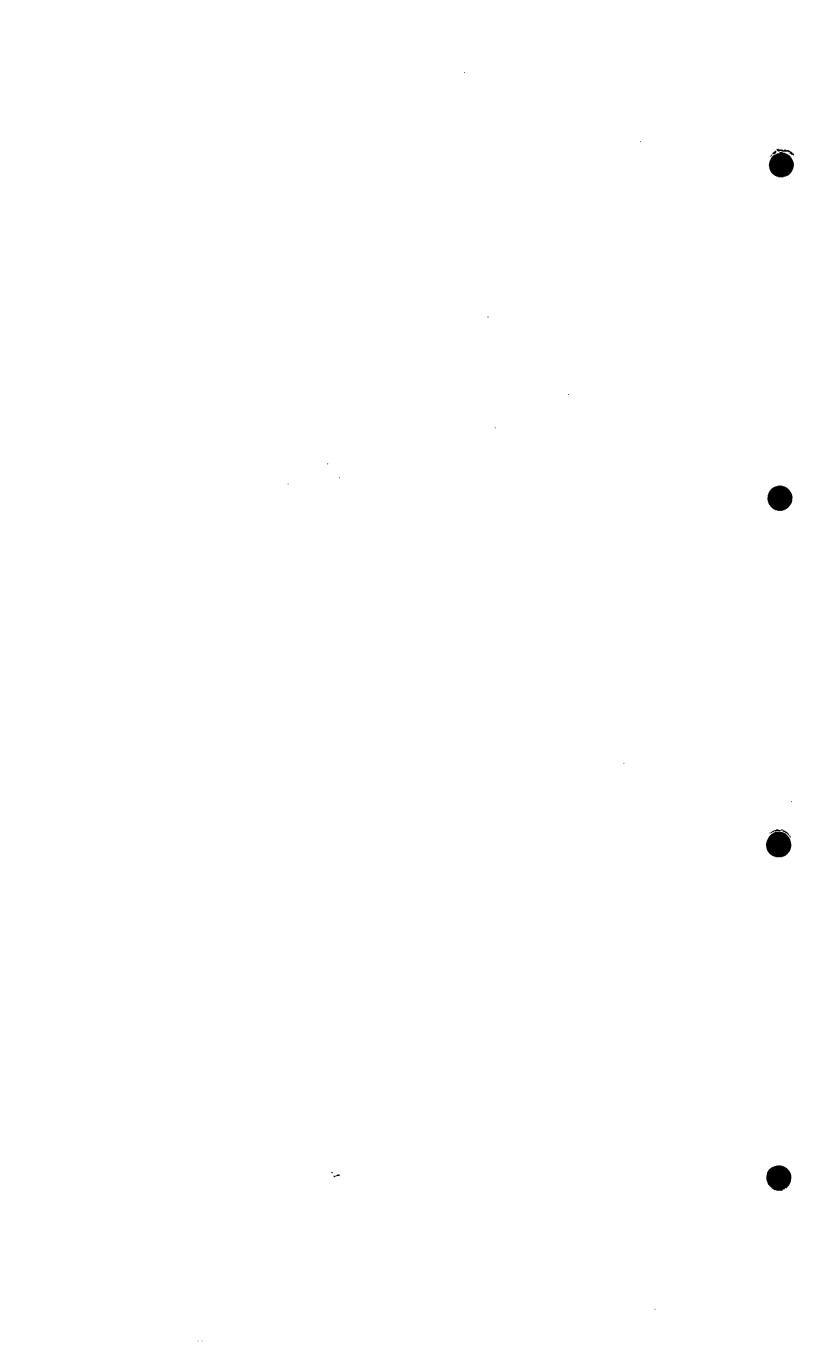

This permit is issued subject to the stipulation between Echo Bay Minerals Company and Lander County, dated May 11, 1993, and with the understanding that no

additional consumptive use of water is granted under this permit.

The total combined consumptive use of water under Permits 49249; 51711, Certificate 12515; 51712, Certificate 12516; 52776; 52777; 52778; 53220; 55178; 55179; 55181; 55183; 55186; 55903; 55904; 55905; 56497; 56498; 56894; 57370; 57967; 58410; 58411; 58412; 58413; 58414; 58720; 58721; 61232; 61233; 61234; 61235 and 61236 will not exceed 3,000.0 acre-feet annually.

Monthly reports will be submitted to the State Engineer stating the amount of water pumped from each well; the amount of water used for mining, milling and related purposes; the amount of water placed in the percolation system; the estimated amount of water evaporative losses from the percolation system and the estimated amount of

water recharged to the groundwater system.
